Index to Limnology and Oceanography

Volume 10, 1965

R prefix to page number indicates article appears in the Redfield Anniversary Volume.

A

Absolute dynamic topography, R265–R273
Accuracy of Winkler method for dissolved oxygen analysis, 135–140
Activation analysis, stable manganese in molluscs determined by, 371–378
Activity in ^{14}C-ampoules in primary production measurement, R247–R252
African lakes, tropical, at moderate altitudes, stratification in, 510–520
Age of Provincelands Hook, R298–R311
Ahlstrom, E. H., co-author of article, 333–340
Air-sea interaction studies, moored stable platform for, R79–R86
Alga, blue-green, planktonic, bloom of, in Tonga Islands, 291–293
Algae, marine, simple method for mass culture of, 492–495
Algae, planktonic, as indicators of lake types, 403–411
Alkaline phosphatase, kinetics of, from echinoplutei, R129–R136
Alkalinity of freshwater, conductometric method for determining, 296–298
Amendment to by-laws, 617
American Institute of Biological Sciences, tables committee, announcement by, 496
American Society of Limnology and Oceanography, Inc., Proceedings of, 162–165
Ammonia-nitrogen content of estuarine and coastal waters, stabilized by freezing, 288–290
Anderson, George C., note by, 477–480, co-author of article, R87–R96
Anderson, John K., co-author of article, 88–95
Annual and semiannual variation of sea surface temperature in North Pacific Ocean, 307–313
Anodonta implicata and *Pomolobus pseudoharengus*, relationship between, R74–R78
Antarctic Ocean, *Gigantocypris* in, 480–482
Antarctic region, sub-, rajiids from, R38–R49
Antarctic waters, pelagic phosphorus metabolism in, 364–370
Antiyeast activity in marine environment, ecology of, 385–391
Apparatus and supplies, notice from committee on, 305–306
Apparatus, continuous-flow, for measuring metabolism of benthic communities, 486–489
Apparatus for holding individual oysters under equal water flows, 605–606
Apparatus for *in situ* primary production studies, 298–300
Aron, W., article by, 333–340
Arthur, Robert S., book reviewed by, 497
Assimilation of inorganic nitrogen sources in lakes, tracer studies of, 53–57
Atkinson, Larry P., co-author of article, R185–R201
Atlantic Bight area, Middle, residual bottom drift in, R50–R53
Atlantic Ocean, submerged peat deposit in, R97–R102
Automated technique for determining growth rate of chain-forming phytoplankton, 598–602
Automatic plankton sampling system, 149–152
Automatic stream drift sampler, 483–485
Avoidance of towed nets by zooplankton, 96–104
Ayers, John C., article by, R9–R14

B

Bachmann, Roger W., article by, 233–239
Bacteria, marine, nitrate reduction by, at increased pressures, 207–214
Bacterium, marine nitrifying, *Nitrosocystis oceanus* sp. n., R274–R289
Baird, I. E., co-author of article, 261–267
Ball, R. C., co-author of article, 74–87
Bandy, Orville L., article by, 314–332
Barlow, John P., article by, R15–R24
Barnstable Harbor, Massachusetts, heat budget for, R9–R14
Bary, B. McK., co-author of article, 333–340
Bathythermograph traces, delineation of layer of maximum salinity by means of, 157–160
Baxter, R. M., article by, 510–520
Bé, A. W. H., co-author of article, 333–340
Beeton, Alfred M., article by, 240–254
Benthic communities, continuous-flow apparatus for measuring metabolism of, 486–489
Benthos, sublittoral and profundal, in Lake Itasca, 591–597
Bibliography of A. C. Redfield, R5–R8
Bien, G. S., article by, R25–R37
Bigelow, Henry B., article by, R38–R49
Bioassay with bacterial uptake kinetics: glucose in freshwater, 471–474
Biogeochemistry of trace element uptake by New Zealand bivalves, 521–527
Biology of sea floor deduced from simultaneous photographs and samples, 1–21
Bioluminescence, diurnal changes in, from sea surface to 2,000 m, R54–R66
Bishop, John W., co-author of article, R15–R24
Bivalves, New Zealand, trace element uptake by, 521–527
Bloom of planktonic blue-green alga in Tonga Islands, 291–293
Bloom, plankton, in Gulf of Maine, phosphorus cycle in, R148–R161
Bobblis, F., Jr., co-author of note, 146–149
Bolyn, Brenda J., co-author of article, 499–509
Bourcart, J., review of book by, 303–304

Bowman, Thomas E., note by, 291–293
Brazzelli, A., co-author of article, 371–378
Broenkow, William W., article by, 40–52, co-author of article, R185–R201
Brook, A. J., article by, 403–411
Brooke, John, co-author of article, R79–R88
Brooks, Robert R., article by, 521–527
Brown, Robert P., note by, 157–160
Buck, John D., article by, 385–391
Budge, Keith M., co-author of article, 207–214
Bumpus, Dean F., article by, R50–R53
Bye, John A. T., article by, 451–458
Byrne, John V., note by, 462–465

C

Calcium carbonate saturation in ocean, 220–225
Canyon Ferry Reservoir, Montana, population dynamics of *Daphnia* in, 583–590
Carbohydrate, dissolved, in Cape Cod waters, general survey, 570–576, diurnal fluctuation in Oyster Pond, 577–582
Carbon fixation, photosynthetic, comparison of ^{14}C technique with direct measurement of, 490–492
Carbon-14 ampoules in primary production measurement, activity in, R247–R252
Carbon-14 technique, comparison of, with direct measurement of photosynthetic carbon fixation, 490–492
Carbon, organic, in open ocean, 544–550
Carbon, particulate organic, size fractionation of, in surface waters of Indian Ocean, 459–462, addendum, 610–611
Carbon, radio-, in Pacific and Indian oceans, related to deep water movements, R25–R37
Carbonate, calcium, saturation in ocean, 220–225
Carbonate equilibria: graphic and algebraic approach, 412–426
Carbonate, particulate, in open ocean, 544–550
Carpenter, James H., article by, 135–140, note by, 141–143
Carr, John F., article by, 551–569
Carter, John C. H., article by, 345–353
Castle Lake, California, hypolimnetic heating in, 233–239
Cayuga Lake, phosphate regeneration by zooplankton in, R15–R24
CCS, controlled conditions system for continuously flowing seawater, 475–477
Cesium-137, uptake and retention of, by seaweeds, 58–66
Chamber, observation, shallow water, 290
Charlier, Roger H., book reviewed by, 303–304
Chesapeake Bay Institute technique for Winkler dissolved oxygen method, 141–143
Chlorophyll *a* content of particulate organic matter in North Sea, 261–267
Chlorophyll and phaeophytin content of chlorophyll maximum, 482–483
Chow, Tsaihwa, J., co-author of article, 226–232
Chukchi Sea, tide and storm surge observations in, 29–39
Circulation, wind-driven, in unstratified lakes, 451–458
Cladocera, chydorid, gynandromorphism in, R103–R114
Clarke, George L., article by, R54–R66
Clarke, W. D., co-author of article, 333–340
Cline, Joel D., co-author of article, R185–R201
Clutter, Robert I., note by, 293–296, co-author of article, 96–104
Cole, Gerald A., article by, 591–597
Color change in the sand flounder *Scopthalamus aquosus*, R230–R246
Comita, Gabriel W., note by, 466–468
Conductometric method for determining alkalinity of freshwater, 296–298
Connaissance des profondeurs oceaniques, review of, 303–304
Controlled conditions system for continuously flowing seawater, 475–477
Cooper, Edwin L., co-author of article, 88–95
Coordinate index, oceanic, announcement, 616
Copepod, *Pseudocalanus minutus*, ecology of, in coastal meromictic lake of northern Labrador, 345–353
Copepod *Pseudocalanus*, relationships between temperature and growth of, 528–538
Correll, David L., article by, 364–370
Corwin, Nathaniel, co-author of article, R148–R161, co-author of note, 280–282
Costa Rica Dome, distribution of nutrients in, 40–52
Counter, *in situ* particle, R162–R168
Crater Lake, Oregon, morphometry of, 462–465
Curl, Herbert, Jr., article by, R67–R73

D

Daphnia magna, feeding rate of, in foods labeled with radioactive phosphorus, 105–113
Daphnia, population dynamics of, in Canyon Ferry Reservoir, 583–590
Davenport, Demorest, article by, R74–R78
Decalcification procedures, effect of, on dry weights of benthic invertebrates, 469–471
Decomposition, organic, in an anoxic fjord, R185–R201
Deffeyes, Kenneth S., article by, 412–426
Degens, E. T., review of book by, 613
Denner, Warren, co-author of article, 443–450
Desmidiaceae as indicators of lake types, 403–411
Development of Provincelands Hook, R298–R311
Device, new photometric, diurnal changes in bioluminescence measured with, R54–R66
Device, self-closing, for sampling plankton near sea bottom, 293–296
Device, water sampling, for small shallow pools, 301–302
Diaptomus siciloides, oxygen uptake in, 466–468
Diatom flowering in Narragansett Bay, 173–184
Diatoms, marine, flotation of, 499–509
Diurnal changes in bioluminescence from sea surface to 2,000 m, R54–R66
Diurnal fluctuation of dissolved carbohydrate in

Oyster Pond, 577–582
Doe, L. A. E., article by, R79–R86
Dondero, N. C., review of book co-edited by, 614–615
Dorris, Troy C., co-author of article, 121–134
Doty, Maxwell S., note by, 282–286
Dragonfly *Plathemis lydia*, uptake and loss of zinc-65 in, 427–433
Dugdale, Richard C., co-author of article, 53–57
Dugdale, Vera A., article by, 53–57
Duff, Sheila, article by, 67–73
Dymond, J. R., review of book edited by, 304
Dynamic topography, absolute, R265–R273

E

Echinoplutei, alkaline phosphatase kinetics of, R129–R136
Ecology of antiyeast activity in marine environment, 385–391
Ecology of calanoid copepod *Pseudocalanus minutus* in coastal meromictic lake of northern Labrador, 345–353
Ectology of Margaree salmon, R137–R147
Edmondson, W. T., article by, R87–R96
Effluent ponds, oil refinery, herbivorous insect populations in, 121–134
Egg production in brown trout (*Salmo trutta*), 88–95
Emery, K. O., articles by, 1–21, R97–R102
Energy measurements in swash-surf zone, 255–260
Energy relationships and primary production in artificial streams, 74–87
Estuarine and coastal waters, freezing to stabilize ammonia-nitrogen content of, 288–290
Estuarine water and sediments, exchange of phosphate between, 167–172
Euphausiid shrimps, maintenance of, 287–288
Euphausiids, wandering, 300
Eutrophication of St. Lawrence Great Lakes, 240–254
Exchange of phosphate between estuarine water and sediments, 167–172
Excretion of organic compounds by marine phytoplankton, 192–206

F

Fauna and salinity in Pocasset River, R216–R229
Fauna, bottom, Lake Erie, 1930–1961, changes in, 551–569
Feeding rate of *Daphnia magna* in foods labeled with radioactive phosphorus, 105–113
Fish and river pollution, review of, 612–613
Fish and wildlife, review of, 304
"Fishbite" damage on deep-sea mooring lines, R259–R264
Fleminger, Abraham, article by, 96–104
Flotation of marine diatoms, 499–509
Flounder, sand, color change in, R230–R246
Folsum, Theodore R., co-author of article, 226–232
Foraminifera, marsh, in Galveston Bay, R169–R184
Foraminiferal parameters and sedimentary environment: Nantucket Bay, 392–402
Foraminiferal trends, Hyperion outfall, 314–332
Foreword to Redfield anniversary volume, R1–R4
Fractionation of phytoplankton communities off Washington and Oregon coasts, 477–480
Fractionation, size, of particulate organic carbon in surface waters of Indian Ocean, 459–462, addendum, 610–611
Freezing, stabilizing ammonia-nitrogen content of estuarine and coastal waters by, 288–290
Frey, David G., Supplement to Vol. 10 by, i–xxix, article by, R103–R114
Fuglister, F. C., article by, R115–R124
Fuss, C. M., Jr., note by, 290

G

Galveston Bay, Texas, patterns of marsh Foraminifera in, R169–R184
Garrett, William D., note by, 602–605
Gas exchange and temperature change in salt-marsh muds, 67–73
Geochemistry of sediments. A brief survey, review of, 613
Geology of sea floor deduced from simultaneous photographs and samples, 1–21
Giese, Graham S., co-author of article, R298–R311
Gigantocypris in Antarctic Ocean, 480–482
Girardi, F., co-author of article, 371–378
Glucose in freshwater, bioassay with bacterial uptake kinetics, 471–474
Goldberg, Edward D., article by, R125–R128
Goldman, Charles R., co-author of article, 233–239
Gordon, Donald G., Jr., co-author of article, 544–550
Gorham, Eville, article by, 268–279
Grant, Carol M., co-author of article, 167–172
Graphite electrode system for measuring dissolved oxygen, 146–149
Great Lakes, St. Lawrence, eutrophication of, 240–254
Gross, M. Grant, books reviewed by, 303, 613
Growth estimates from ribonucleic acid content, R253–R258
Growth of *Pseudocalanus* and temperature, 528–538
Growth rate of chain-forming phytoplankton, automated technique for determining, 598–602
Gulf of Maine, phosphorus cycle in plankton bloom in, R148–R161
Gulf Stream, new method of tracking, R115–R124
Gutknecht, John, article by, 58–66
Gynandromorphism in chydorid Cladocera, R103–R114.

H

Hampson, G. R., co-author of article, R216–R229
Haven, Dexter S., note by, 605–606
Heat budget of Barnstable Harbor, R9–R14
Heating, hypolimnetic, in Castle Lake, 233–239
Hellebust, J. A., article by, 192–206
Herbivore growth related to rate of gross photosynthesis in microcosms, 539–543
Heukelekian, H., review of book edited by, 614–615

Hidaka, Koji, studies on oceanography—a collection of papers dedicated to, review of, 497
Hiltunen, Jarl K., co-author of article, 551–569
History of water level change and sedimentation in Lake Tanganyika, 607–610
Hobbie, John E., note by, 471–474, co-author of article, 22–28
Hsiao, Sidney C., article by, R129–R136
Hunkins, Kenneth L., article by, 29–39
Huntsman, A. G., article by, R137–R147
Hyperion outfall, California, foraminiferal trends, 314–332
Hypolimnetic heating in Castle Lake, 233–239

I

Ice, melt patterns in, R290–R297
In situ light measurements working group, report of, 161–162
In situ particle counter, R162–R168
Indian Ocean, radiocarbon in, R25–R37
Indian Ocean, size fractionation of particulate organic carbon in surface waters of, 459–462, addendum, 610–611
Indicators of lake types, planktonic algae as, 403–411
Infaunal environment of a sand flat, temperature in, 114–120
Ingle, James C., Jr., co-author of article, 314–332
Insect populations, herbivorous, in oil refinery effluent ponds, 121–134
Intercalibration of marine plankton primary productivity techniques, 282–286
International Marine Science, subscriptions to, 616
Invertebrates, benthic, effect of decalcification procedures on dry weights of, 469–471

J

Jacobs, W. C., book reviewed by, 613–614
Jitts, Harry R., co-author of note, 282–286
Johannes, R. E., article by, 434–442
Johnson, Ralph Gordon, article by, 114–120
Jones, J. R. Erichsen, review of book by, 612–613

K

Kanwisher, John W., co-author of article, R162–R168
Katz, Max, book reviewed by, 612–613
Kelley, Mahlon G., co-author of article, R54–R66
Ketchum, Bostwick H., article by, R148–R161, foreword to Redfield anniversary volume by, R1–R4
Kevern, N. R., article by, 74–87
Kinetics of echinoplutei alkaline phosphatase, R129–R136
Koblentz-Mishke, Olga, co-author of note, 282–286
Kormondy, Edward J., article by, 427–433

L

Laevastu, Taivo, note by, 144–146
Lake Erie, 1930–1961, changes in bottom fauna of, 551–569
Lake Itasca, Minnesota, sublittoral and profundal benthos in, 591–597
Lake Maggiore, Italy, stable manganese in molluscs from, 371–378
Lake Nitinat, British Columbia, an anoxic fjord, organic decomposition in, R185–R201
Lake Tanganyika, East Africa, sedimentation and history of water level change in, 607–610
Lancaster, L. J., co-author of note, 291–293
Lasker, Reuben, note by, 286–287
Lidz, Louis, article by, 392–402
Lie, Ulf, article by, 379–384
Limnology in the Soviet Union, Supplement to Vol. 10, January 1965, i-xxix
Livingstone, D. A., note by, 607–610
Lorenzen, Carl J., note by, 482–483
Loss of zinc-65 in *Plathemis lydia*, 427–433

M

McConnell, William J., article by, 539–543
McFadden, James T., article by, 88–95
McIntire, C. David, co-author of article, 341–344
McLaren, Ian A., article by, 528–538
McLeod, G. C., note by, 146–149
McMahon, J. W., article by, 105–113
Maddux, William S., article by, R162–R168
Manganese, stable, in molluscs, determined by activation analysis, 371–378
Manganese^{++} in open ocean, 544–550
Mangelsdorf, P. C., Jr., co-author of article, R216–R229
Marine geology of the Gulf of California, review of, 303
Marsh Foraminifera in Galveston Bay, R169–R184
Martin, John H., article by, 185–191
Marvin, Kenneth T., note by, 288–290
Mass culture of marine algae, 492–495
Mathematical model of regional variations in plankton, R202–R215
Mauchline, J., note by, 300
Mellita quinquiesperforata, observations on, 152–155
Melt patterns in ice over shallow waters, R290–R297
Menzel, David W., note by, 280–282, co-author of note, 490–492
Merlini, Margaret, article by, 371–378
Merrill, Arthur S., co-author of article, 1–21
Meyers, Samuel P., co-author of article, 385–391
Molluscs, stable manganese in, 371–378
Mooring lines, deep-sea, "fishbite" damage on, R259–R264
Morales-Alamo, R., co-author of note, 605–606
Morphometry of Crater Lake, Oregon, 462–465
Müller, K., note by, 483–485
Mullin, Michael M., note by, 459–462, addendum to note by, 610–611

N

Nantucket Bay, Massachusetts, sedimentary environment and foraminiferal parameters in, 392–402

Narragansett Bay, phytoplankton-zooplankton relationships in, 185–191
Narragansett Bay, winter-spring diatom flowering in, 173–184
Nets, towed, avoidance of, by zooplankton, 96–104
New Zealand bivalves, trace element uptake by, 521–527
Nitrate reduction by marine bacteria at increased pressures, 207–214
Nitrifying bacterium, marine, *Nitrosocystis oceanus*, sp. n., R274–R289
Nitrogen, ammonia-, content of estuarine and coastal waters stabilized by freezing, 288–290
Nitrogen metabolism in lakes, tracer studies of assimilation of inorganic nitrogen sources, 53–57
Nitrosocystis oceanus sp. n., characteristics of, R274–R289
Nitzschia seriata, experimental observations on flotation of, 499–509
Norris, Kenneth S., announcement by, 616
North Pacific Ocean, *see* Pacific Ocean
North Sea, chlorophyll *a* content of particulate organic matter in, 261–267
Notice from committee on apparatus and supplies, 305–306
Nutrient regeneration, influence of marine protozoa on, 434–442
Nutrients in Costa Rica Dome, distribution of, 40–52

O

Oceanic Coordinate Index, announcement, 616
Ogren, L. H., co-author of note, 290
Oil refinery effluent ponds, herbivorous insect populations in, 121–134
Optical comparator as tool in plankton research, 156–157
Organic aggregates in waters of Sargasso Sea, 354–363
Organic compounds, excretion of, by marine phytoplankton, 192–206
Organic decomposition in Lake Nitinat, an anoxic fjord, R185–R201
Organic matter, particulate, in North Sea, chlorophyll *a* content of, 261–267
Organic solutes in lake water, uptake of, 22–28
Oxidizing conditions, influence of, on distribution of elements in lake sediments, 268–279
Oxygen consumption in seawater, 144–146
Oxygen, dissolved, accuracy of Winkler method for, 135–140
Oxygen, dissolved, Chesapeake Bay Institute technique for, 141–143
Oxygen, dissolved, graphite electrode system for measuring, 146–149
Oxygen supply of deep Pacific Ocean, 215–219
Oxygen uptake in *Diaptomus siciloides*, 466–468
Oysters, individual, apparatus for holding under equal water flows, 605–606

P

Pacific Ocean, deep, oxygen supply of, 215–219
Pacific Ocean, distribution of nutrients in Costa Rica Dome, 40–52
Pacific Ocean, North, annual and semiannual variation of sea surface temperature in, 307–313
Pacific Ocean, radiocarbon in, R25–R37
Pamatmat, Mario M., note by, 486–489, co-author of article, 379–384
Parsons, T. R., note by, 598–602
Pattullo, June, article by, 443–450
Pautzke, Clarence F., book reviewed by, 304
Peat deposit, submerged, in Atlantic Ocean, R97–R102
Periphyton communities, temperature effects on metabolism of, 341–344
Persulfate oxidation, total phosphorus in seawater measured by, 280–282
Phaeophytin and chlorophyll content of chlorophyll maximum, 482–483
Pharmacology of color change in *Scopthalamus aquosus*, R230–R246
Phinney, Harry K., article by, 341–344
Phleger, Fred B., article by, R169–R184
Phosphatase, echinoplutei alkaline, kinetics of, R129–R136
Phosphate exchange between estuarine water and sediments, 167–172
Phosphate regeneration by zooplankton in Cayuga Lake, R15–R24
Phosphorus cycle in plankton bloom in Gulf of Maine, R148–R161
Phosphorus, pelagic, metabolism in Antarctic waters, 364–370
Phosphorus, radioactive, feeding rate of *Daphnia magna* in foods labeled with, 105–113
Phosphorus, total, measured by persulfate oxidation, 280–282
Photographs and samples, simultaneous, geology and biology of sea floor as deduced from, 1–21
Photometric device, new, used to measure diurnal changes in bioluminescence, R54–R66
Photosynthesis, gross, in microcosms, herbivore growth related to, 539–543
Photosynthetic assimilation ratios in marine phytoplankton communities, R67–R73
Photosynthetic carbon fixation, comparison of ^{14}C technique with direct measurements of, 490–492
Physiology of color change in *Scopthalamus aquosus*, R230–R246
Phytoplankton, chain-forming, automated technique for determining growth rate of, 598–602
Phytoplankton communities, fractionation of, off Washington and Oregon coasts, 477–480
Phytoplankton communities, natural, marine, photosynthetic assimilation ratios in, R67–R73
Phytoplankton, marine, excretion of organic compounds by, 192–206
Phytoplankton-zooplankton relationships in Narragansett Bay, 185–191
Pietra, R., co-author of article, 371–378
Pillai, K. C., co-author of article, 226–232
Plankton bloom in Gulf of Maine, phosphorus cycle in, R148–R161
Plankton, marine, primary productivity techniques, intercalibration of, 282–286

Plankton, mathematical model of regional variations in, R202–R215
Plankton research, optical comparator as tool in, 156–157
Plankton sampling gear, towing characteristics of, 333–340
Plankton, sampling near sea bottom, self-closing device for, 293–296
Plankton sampling system, automatic, 149–152
Platform, moored stable, for air-sea interaction studies, R79–R86
Plathemis lydia, uptake and loss of zinc-65 in, 427–433
Pleistocene, marine sedimentation rates during, R125–R128
Pocasset River, Massachusetts, fauna and salinity in, R216–R229
Pomeroy, Lawrence R., article by, 167–172
Pomolobus pseudoharengus and *Anodonta implicata*, relationship between, R74–R78
Population dynamics of *Daphnia* in Canyon Ferry Reservoir, 583–590
Pratt, David M., article by, 173–184
Pressures, increased hydrostatic, nitrate reduction by marine bacteria at, 207–214
Principles and applications in aquatic microbiology, review of, 614–615
Prindle, Bryce, co-author of article, R259–R264
Proceedings of American Society of Limnology and Oceanography, Inc., 162–165
Proctor, Raphael R., Jr., co-author of note, 288–290
Production, egg, in brown trout (*Salmo trutta*), 88–95
Productivity, primary, and energy relationships in artificial streams, 74–87
Production, primary, convenient apparatus for *in situ* studies of, 298–300
Production, primary, determination of activity in ^{14}C-ampoules for measuring, R247–R252
Productivity, primary, marine plankton, techniques, intercalibration of, 282–286
Prosser, M. V., co-author of article, 510–520
Protozoa, marine, influence of, on nutrient regeneration, 434–442
Provincelands Hook, Outer Cape Cod, Massachusetts, age and development of, R298–R311
Pseudocalanus minutus, ecology of, in coastal meromictic lake of northern Labrador, 345–353
Pseudocalanus, relationships between temperature and growth of, 528–538
Pytkowicz, R. M., article by, 220–225

R

Radiocarbon, *see* carbon-14
Rajiids from sub-Antarctic region, R38–R49
Rakestraw, N. W., co-author of article, R25–R37
Redfield, A. C., bibliography of, R5–R8
Redfield Anniversary Volume, Supplement to Vol. 10, November 1965, R1–R311
Reducing conditions, influence of, on distribution of elements in lake sediments, 268–279
Regional variations in plankton, mathematical model of, R202–R215
Report of *in situ* light measurements working group, 161–162
Residual bottom drift in Middle Atlantic Bight area, R50–R53
Resig, Johanna M., co-author of article, 314–332
Retention of cesium-137 and zinc-65 by seaweeds, 58–66
Ribonucleic acid content, growth estimates from, R253–R258
Richards, Francis A., article by, R185–R201
Richards, Norman J., note by, 469–471
Richards, Sarah W., co-author of note, 469–471
Rigler, F. H., co-author of article, 105–113
Riley, Gordon A., articles by, 354–363, R202–R215
Rittenberg, S. C., book reviewed by, 614–615
Rubidium in seawater, 226–232
Rubin, Meyer, co-author of article, R97–R102
Rumsby, Martin G., co-author of article, 521–527
Runnells, Donald D., note by, 296–298
Ryther, J. H., note by, 490–492

S

Saijo, Yatsuke, co-author of note, 282–286
St. Lawrence Great Lakes, eutrophication of, 240–254
Saline lakes in central Washington, R87–R96
Salinity and fauna in Pocasset River, R216–R229
Salinity, maximum, delineation of the layer of, 157–160
(*Salmo trutta*), egg production in brown trout, 88–95
Salmon, Margaree, ectology of, R137–R147
Salsman, G. G., note by, 152–155
Salt-marsh muds, Nova Scotia and Georgia, temperature change and gas exchange in, 67–73
Sampler, stream drift, automatic, 483–485
Samples and photographs, simultaneous, geology and biology of sea floor as deduced from, 1–21
Sampling device, water, for small shallow pools, 301–302
Sampling efficiency and digging characteristics of 0.1 m^2 van Veen grab, 379–384
Sampling gear, plankton, towing characteristics of, 333–340
Sampling plankton near sea bottom, self-closing device for, 293–296
Sampling system, automatic plankton, 149–152
Sand dollar, *Mellita quinquiesperforata*, observations on, 152–155
Sanders, H. L., article by, R216–R229
Sargasso Sea, organic aggregates in waters of, 354–363
Schiffman, Arnold, article by, 255–260
Schroeder, William C., co-author of article, R38–R49
Scopthalamus aquosus, color change in, R230–R246
Scott, George T., article by, R230–R246
Sears, Mary, bibliography of A. C. Redfield compiled by, R5–R8

Seawater characteristics along the Oregon coast, processes affecting, 443–450
Seaweeds, uptake and retention of cesium-137 and zinc-65 by, 58–66
Sedimentary environment and foraminiferal parameters: Nantucket Bay, 392–402
Sedimentation and history of water level change in Lake Tanganyika, 607–610
Sedimentation rates, marine, during Pleistocene, R125–R128
Sediments and estuarine water, exchange of phosphate between, 167–172
Sediments, lake, influence of oxidizing and reducing conditions on distribution of elements in, 268–279
Semiannual and annual variation of sea surface temperature in North Pacific Ocean, 307–313
Shor, George G., Jr., review of book co-edited by, 303
Slick-forming materials from sea surface, collecting, 602–605
Small, Lawrence F., co-author of article, R67–R73
Smayda, Theodore J., article by, 499–509
Smith, E. E., co-author of article, 167–172
Smith, Raymond C., article by, 226–232
Song, Moon Ki, co-author of note, 144–146
Soviet Union, Limnology in, Supplement to Vol. 10, January 1965, i–xxix
Steele, J. H., article by, 261–267
Steemann Nielsen, E., article by, R247–R252
Storm surge observations in Chukchi Sea, 29–39
Stratification in tropical African lakes at moderate altitude, 510–520
Streams, artificial, primary productivity and energy relationships in, 74–87
Streams, laboratory, temperature effects on metabolism of periphyton communities developed in, 341–344
Studies on oceanography—a collection of papers dedicated to Koji Hidaka, review of, 497
Sub-Antarctic, *see* Antarctic
Submerged peat deposit in Atlantic Ocean, R97–R102
Suess, H. E., co-author of article, R25–R37
Summer standing crop of sublittoral and profundal benthos in Lake Itasca, 591–597
Supplement to Vol. 10: Limnology in the Soviet Union, January 1965, i–xxix
Supplement to Vol. 10: Redfield Anniversary Volume, November 1965, R1–R311
Supplies and apparatus, notice from committee on, 305–306
Sutcliffe, W. H., Jr., article by, R253–R258
Swaine, Dalway J., co-author of article, 268–279
Swanson, George A., note by, 149–152
Swash-surf zone, energy measurements in, 255–260
Symposium—environmental measurements—valid data and logical interpretation, review of, 613–614

T

Talling, J. F., co-author of article, 510–520
Tasha, Herman J., co-author of article, R298–R311
Teal, John M., co-author of article, 67–73
Temperature and growth, relationships between, of copepod *Pseudocalanus*, 528–538
Temperature change and gas exchange in salt-marsh muds, 67–73
Temperature effects on metabolism of periphyton communities, 341–344
Temperature, sea surface, annual and semiannual variation, in North Pacific Ocean, 307–313
Temperature variation in infaunal environment of sand flat, 114–120
Tessiarsuk, a coastal meromictic lake of northern Labrador, ecology of *Pseudocalanus minutus* in, 345–353
Thalassiosira cf. *nana*, experimental observations on flotation of, 499–509
Thalassiosira rotula, experimental observations on flotation of, 499–509
Theilacker, Gail H., co-author of note, 286–287
Tibbs, John F., note by, 480–482
Tide observations in Chukchi Sea, 29–39
Tolbert, W. H., co-author of note, 152–155
Tonga Islands, bloom of planktonic blue-green alga in, 291–293
Topography, absolute dynamic, R265–R273
Trace element uptake by New Zealand bivalves, 521–527
Tracer studies of assimilation of inorganic nitrogen sources in lakes, 53–57
Tracking the Gulf Stream, R115–R124
Trichodesmium erythraeum, bloom of, in Tonga Islands, 291–293
Trout, brown, egg production in, 88–95
Trumbull, V. A., co-author of article, 1–21
Tubb, Richard A., article by, 121–134
Turner, Harry J., Jr., article by, R259–R264
Tuttle, Sherwood D., co-author of article, R298–R311

U

Ukeles, Ravenna, note by, 492–495
Underhill, James C., co-author of article, 591–597
Unstratified lakes, wind-driven circulation in, 451–458
Uptake kinetics, bacterial, glucose in freshwater, 471–474
Uptake of cesium-137 and zinc-65 by seaweeds, 58–66
Uptake of organic solutes in lake water, 22–28
Uptake of zinc-65 in *Plathemis lydia*, 427–433
Uptake, oxygen, in *Diaptomus siciloides*, 466–468
Uptake, trace element, by New Zealand bivalves, 521–527

V

van Andel, Tjeerd H., review of book edited by, 303
Van Hemert, Denise, co-author of article, 354–363
van Veen grab, 0.1 m^2, digging characteristics and sampling efficiency of, 379–384
von Arx, William S., article by, R265–R273
Voorhis, A. D., co-author of article, R115–R124

W

Walsh, Gerald E., articles by, 570–576, 577–582
Wangersky, Peter J., article by, 544–550, co-author of article, 354–363
Warmuth, Maryanna, co-author of article, R74–R78
Watson, Stanley W., article by, R274–R289
Watt, W. D., note by, 298–300
Weibezahn, Franz H., note by, 301–302
Weyl, Peter K., article by, 215–219
Wigley, R. L., co-author of article, R97–R102
Wind-driven circulation in unstratified lakes, 451–458
Winter-spring diatom flowering in Narragansett Bay, 173–184
Wolfson, Fay H., note by, 156–157
Wood, Langley, note by, 475–477
Wood, R. B., co-author of article, 510–520
Woodcock, Alfred H., article by, R290–R297
Wright, John C., article by, 583–590
Wright, Richard T., article by, 22–28, co-author of note, 471–474
Wyrtki, Klaus, article by, 307–313

Y

Yentsch, C. S., co-author of note, 146–149
Yoshida, Kozo, review of book edited by, 497

Z

Zeigler, John M., article by, R298–R311
Zeitlin, Harry, co-author of note, 144–146
Zinc-65, uptake and loss of, in *Plathemis lydia*, 427–433
Zinc-65, uptake and retention of, by seaweeds, 58–66
ZoBell, Claude E., article by, 207–214
Zooplankton, avoidance of towed nets by, 96–104
Zooplankton, phosphate regeneration by, R15–R24
Zooplankton-phytoplankton relationships in Narragansett Bay, 185–191
